

Time Without Tide – Rules Reference

Tests

- Test difficulty range is 1-5, 2 is the default, marked as [number]M.
- Roll [trait+skill]d6, each 5-6 is a mark.
- Reroll some dice by straining and receiving 1 mind damage (1 per roll).
- Assists add skill/2 dice (rounded up).
- Extra marks become boons that might enable special effects, must be spent immediately.
- Contests are tests taken by adversarial characters: Winners win, losers lose, compare boons to resolve draws, re-roll to resolve true draws.
- Project tests require PL (Project Length) total successes:
 - Each boon can add a success to the PL track.
 - Sometimes tests take some time (1h, segment, etc), can be parallelized.

Combat

- Initiative: Everyone rolls 1d6, PCs before NPCs in draws.
- 1 major action and 1 minor action per turn.
- If unwarded at turn end: 2M will+survive, 1 will damage on failure.
- Each trait is also a health bar, they are damaged separately.
- Armor soaks damage before body, restored at start of turn.
- Melee attack: 2M body+violence.
- Ranged attack: 2M mind+violence.
- Thrown attack: 2M body+violence.
- Ranges are measured in zones. All targets in your zone are within reach.

Warding

Self zone is warded if have 1+ ward. If have 2+ ward and move, shine or repel, you may assign ward.

Assign ward: Target number of zones equal to ward score which connect to your zone (including it), all are warded until you are forcibly moved or path is broken.

Dying

When any health bar gets to 0, roll a recovery test of 2M will+survival, +1M per damage below 0, +1M if unwarded.

- Success: Heal 1.
- Failure: Manifest a random malignant adaptation, become Critical.

Travel

Traveling between leagues (=exiting a league) takes at least 1 segment.

Leagues have terrains:

- Forest: Takes 2 segments, entering doesn't reveal adjacent leagues.
- Water: Can't travel without a boat.

At segment start:

- Assign 1 ward (value, not item) per delver.
- Keeper rolls 2d6, each 6 triggers random event.

During segment:

- Choose where to go / what to do.
- Deal with random events.

Obstacles increase travel length by 1 (or more) segment(s) if take >1h to complete.

- Cliff: [2x party]PL 2M body+navigation project to cross, tests take 1 segment, 1 body damage on failure.
- River: Always crossed, 2M body+navigation test to avoid 1 piercing body damage, can ferry 1 ally by adding +1M, both damaged on failure.

At segment end, unwarded delvers roll 2M will+survival to avoid 1 will damage.
